Postal / Zip Code	31063
Country	United States
Position Available (Title, Dates, and Job Description):	I am looking for an associate that has a strong interest in small animals but is willing to do a small amount of large animal medicine. My practice is 50% small animal and 50% large animal. My practice is located in a rural area in Southwest Georgia. On the small animal side, I do a lot of routine health checks, spays and neuters, and some orthopedic procedures. We are equipped with digital X-ray, ultrasound and blood machines. On the large animal side, I do herd health, artificial insemination and embryo transfer on cattle and I do a small amount of limited equine work. I also deal with goats, pigs and show cattle. If interested please email me.
