Country	United States
Position Available (Title, Dates, and Job Description):	<p>Position: Veterinary Surgeon</p> <p>The Northeast Veterinary Referral Hospital is seeking an additional surgeon to join our team! We offer an unusually high compensation package in a purpose driven environment. As an AAHA Accredited growing referral and emergency practice, we reside in an area that offers many large city amenities, but in a small town atmosphere.</p> <p>Situated in northeast Pennsylvania, the Wilkes-Barre/Scranton area is served by a convenient, international airport, and Philadelphia and New York City are both just two hours away by car. The Pocono Mountains provide the backdrop for skiing and limitless outdoor activities. Our area is home to the Pittsburgh Penguins' farm team and the NY Yankees' minor league team. We have two major concert venues. The educational needs of the area are met by a dozen colleges and universities. Opportunities for shopping, fine dining and participation in cultural activities abound.</p> <p>Our specialty services consist of internal medicine, surgery, critical care, emergency care, rehabilitation, and cardiology. Due to our rapidly expanding patient volume, you would be provided an excellent opportunity to see a variety of specialty cases and develop your special interests. Our emergency service is comprised of a group of seven energetic emergency associates under the direction of a certified VECCS Criticalist who work together cohesively to provide 24 hour service with a very high standard of care. We offer physical rehabilitation and acupuncture and are looking to add ophthalmology and dermatology. Candidates should be either board certified or have successfully completed an approved residency program.</p> <p>Our diagnostic lab is fully stocked with 3 Idexx catalyst machines, a Procyte CBC machine, Coagulation testing (PT/PTT), and a Urinalysis and Snap test reader. Additionally, we are equipped with a Nova Critical Care blood gas machine. In our radiology suite, we have digital radiographs and a Philips HDX11 ultrasound machine that provides optimal imaging quality and has color flow and tissue Doppler capabilities. We have two fully equipped surgical suites with digital endoscopy, arthroscopy, and laparoscopic equipment. We currently offer ambulatory surgery in the referring vet's office in the greater eastern and central PA area.</p> <p>We offer a generous benefits package including excellent compensation</p>

(base salary up to \$150,000 and \$165,000 to board certified candidates), production bonus or percentage, health/dental/vision insurance, retirement savings plan, vacation, CE allowances and the potential for future buy-in makes us unique in the field. This is an excellent opportunity for extensive earnings. We would enjoy hearing from those with the capacity and drive to help us rank among the best! Please direct inquiries to Donald Roskos, Administrator at (570) 208-8844. For more information about our hospital, visit us on the web at www.northeast-vet.com.
